CSA1522 - CLOUD COMPUTING AND BIG DATA ANALYTICS
Experiment-2

2. Create a simple cloud software application for Property Buying & Rental process (In Chennai city) using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Buy, Rent, commercial, Rental Agreement , Rental Agreement, Area, place, Range, property value etc.

AIM:

To develop a simple Property Buying and Rental application for Chennai city using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application records property enquiries (Buy / Rent, Residential / Commercial), customer profiles and rental terms such as rental agreement, area, budget range and property value.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named Chennai Property Management System.

Create the form Property Enquiry with the following fields:

- Enquiry Reference, Enquiry Date
- Transaction Type (Buy / Rent)
- Property Category (Residential / Commercial)
- Property Type (Villa, Land, Office, etc.)
- Location, Area / Locality, Property Area
- Budget Range, Property Value
- Enquiry Status, Additional Requirements, Assigned Staff, Remarks, Customer

Create the form Customer Profile with the following fields:

- Customer Name, Email Address, Mobile Number, Address
- Customer Type (Company / Individual / Other)
- Date Registered, Customer Code
- Preferred Location, Registration Source

Create the form Rental Terms with fields such as Monthly Rent, Maintenance Charges, Security Deposit and Rental Agreement Required.

Create a workflow named Auto-Generate Customer Code on the Customer Profile form (Created, Load of the form) with a Deluge script that generates a unique Customer Code.

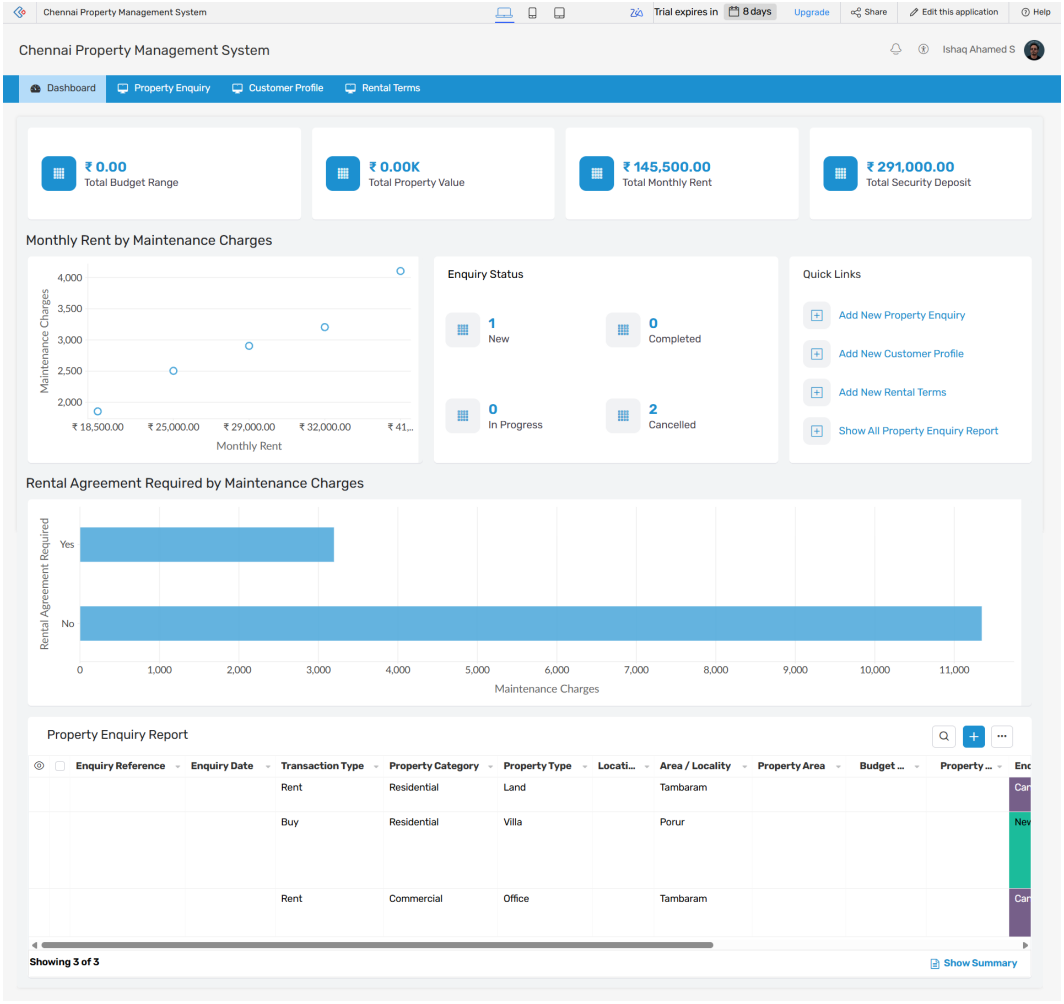

Create a Dashboard showing Total Monthly Rent, Total Security Deposit, Enquiry Status, charts and the Property Enquiry Report.

Save and publish the application.

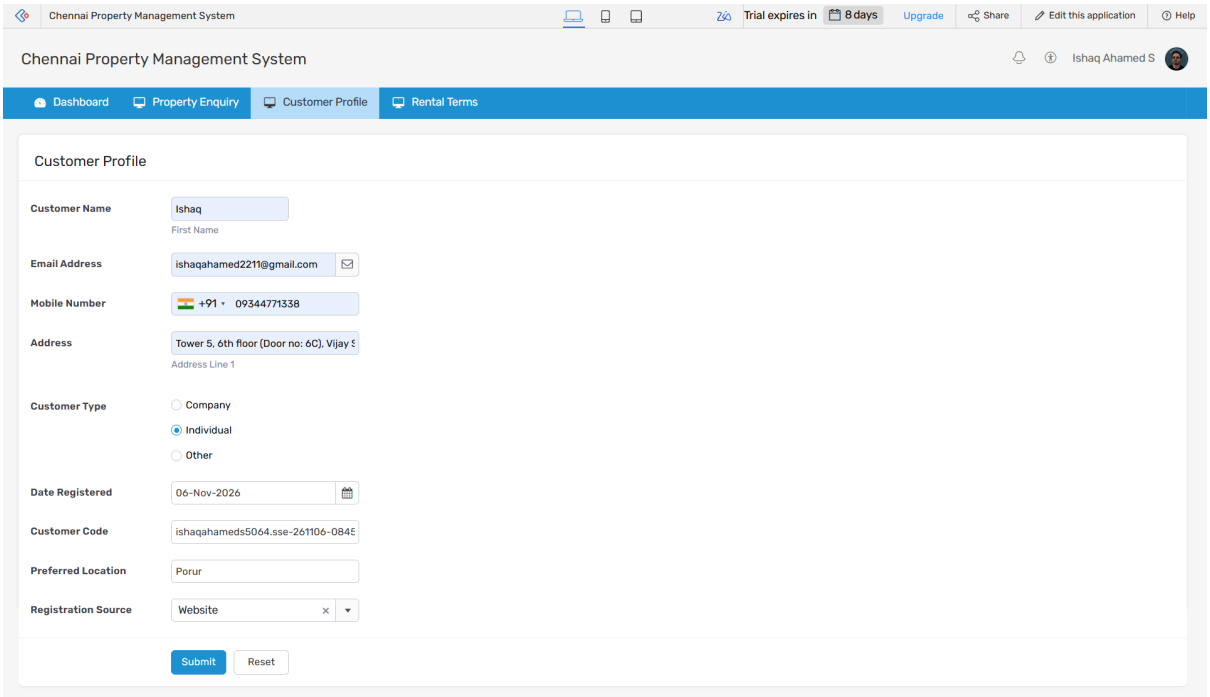

Enter sample customer and property enquiry details.

Verify the records in the reports and the dashboard.

WORKFLOW:

RESULT:

A cloud-based Property Buying and Rental application for Chennai city was successfully developed using Zoho Creator. The application stores property enquiries (Buy / Rent, Residential / Commercial), customer profiles and rental terms, automatically generates the customer code, and displays the records in reports and a dashboard. This demonstrates the Software as a Service (SaaS) model using a cloud platform.
