CSA1522 - CLOUD COMPUTING AND BIG DATA ANALYTICS
Experiment-3

3. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

AIM:

To develop a simple Car Booking Reservation System using Zoho Creator (Cloud Service Provider) to demonstrate the Software as a Service (SaaS) model. The application captures cab booking details such as pickup and drop locations, booking type (local rental, package booking, airport transfer), trip type (one way, round trip), package type, hours / days, customer and driver details.

PROCEDURE:

Log in to Zoho Creator.

Create a new application named Car Booking Reservation System.

Create the form Car Booking with the following fields:

- Booking Reference, Booking Date, Pickup Date, Pickup Time
- Booking Type (Local Rental / Package Booking / Airport Transfer)
- Pickup Location, Drop Location, Number of Passengers
- Trip Type (One Way / Round Trip / Other), Travel Distance KM
- Car Type, Transmission, AC Preference
- Rental Type, Package Type, Number of Hours, Number of Days, Return Date
- Additional Requirements
- Estimated Fare, Advance Payment, Balance Amount, Payment Method, Payment Status
- Booking Status, Customer, Driver

Create the form Customer Details (Customer Name, Email Address, Mobile Number, Pickup Address, Customer Code, Preferred Language, Loyalty Tier, etc.).

Create the form Driver Details (Driver Name, Mobile Number, Driving Licence Number, Vehicle Registration Number, Vehicle Model, Vehicle Type, Availability Status, Driver Code, etc.).

Create a workflow named Auto Assign Driver on Booking on the Car Booking form (Created, Successful form submission) with a Deluge script that fetches the first available driver and assigns it to the booking.

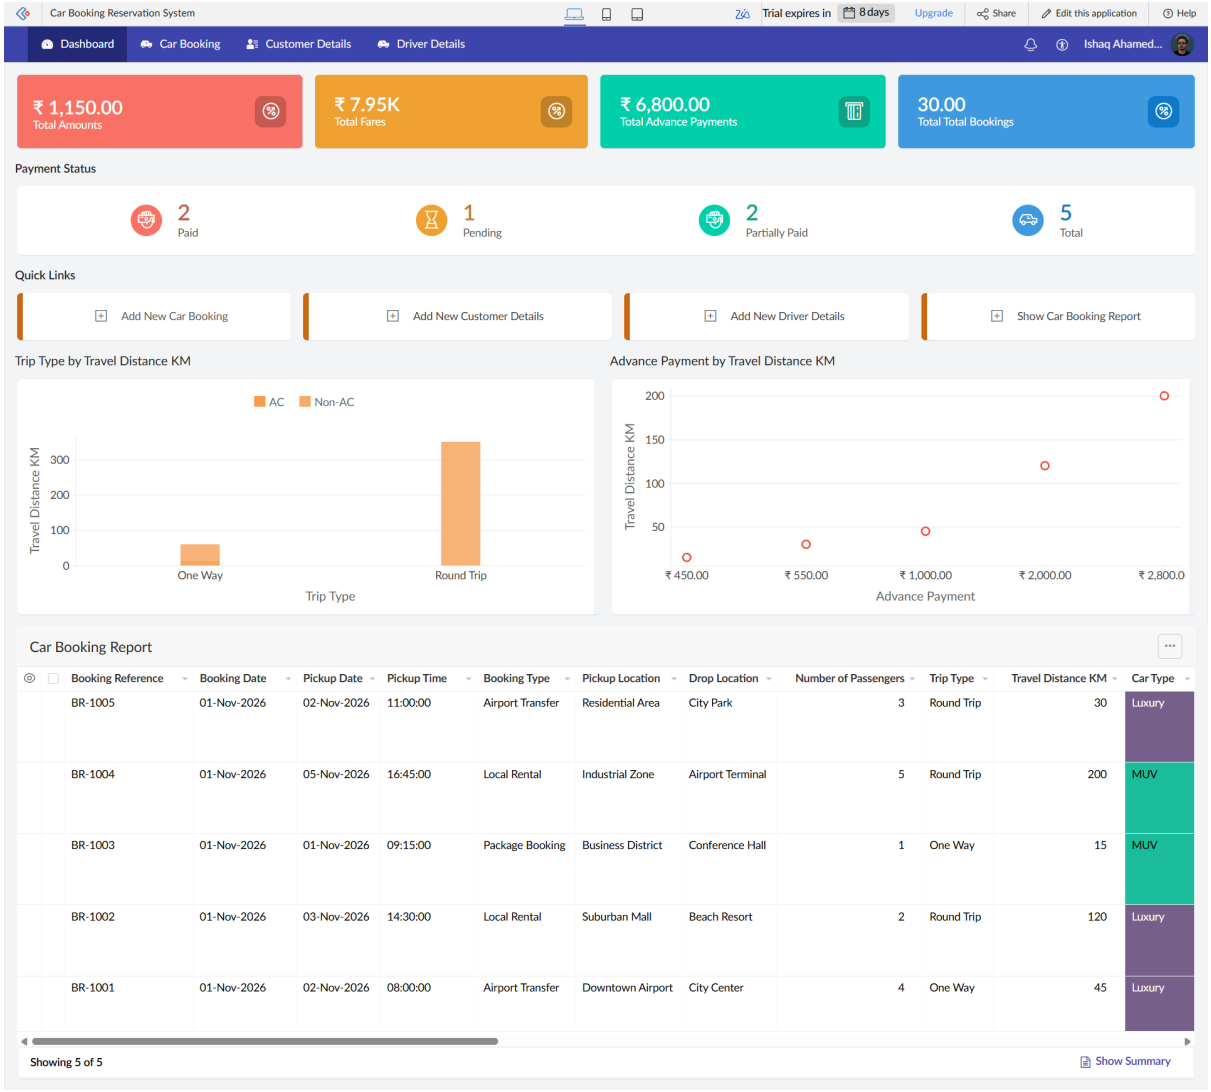

Create a Dashboard showing total fares, advance payments, payment status, charts and the Car Booking Report.

Save and publish the application.

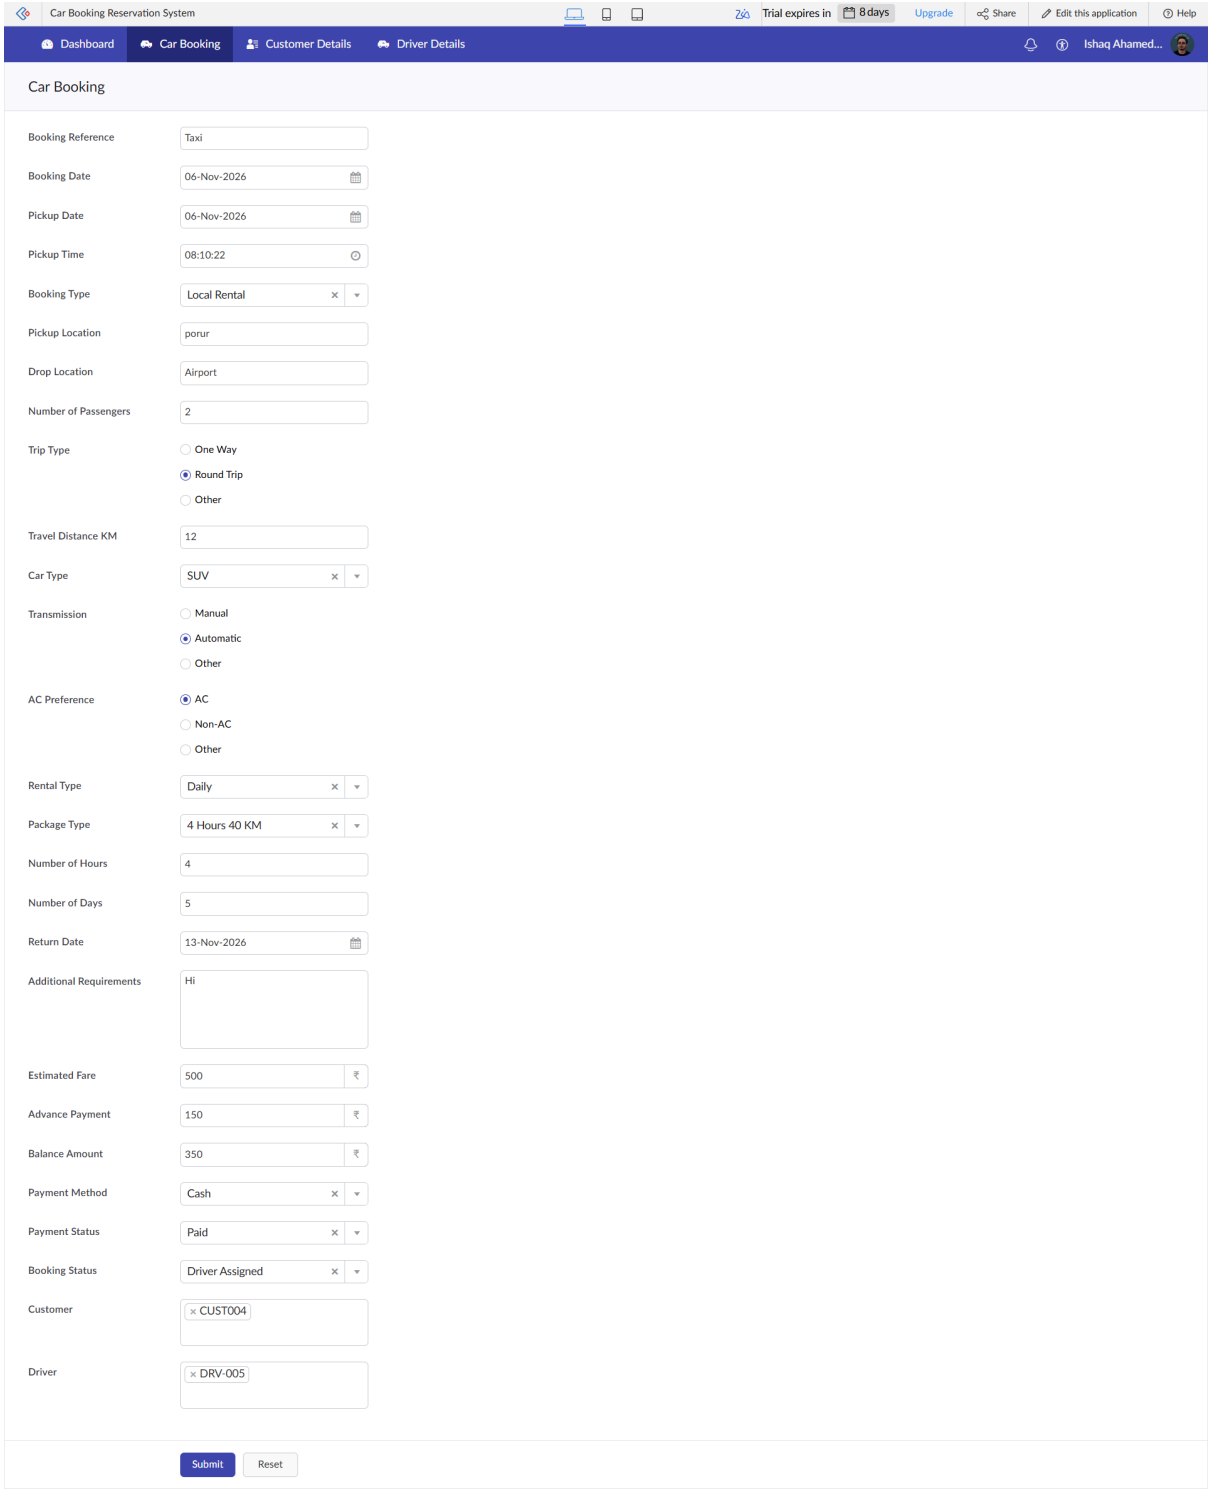

Enter sample booking details and submit the form.

Verify the records in the report and the dashboard.

WORKFLOW:

RESULT:

A cloud-based Car Booking Reservation System was successfully developed using Zoho Creator. The application stores booking, customer and driver details, automatically assigns an available driver to each booking, and displays the records in a report and dashboard. This demonstrates the Software as a Service (SaaS) model using a cloud platform.
